A Worthy Charity Fundraiser

The Zoe Thomas Foundation supports young disadvantaged people to thrive through into adulthood by helping them develop their talents, skills, well-being and social inclusion.

We value the emotional and social needs of disadvantaged children, teenagers and young adults in our communities. These needs are impacted by disadvantage and can impede or prevent young people from realising their potential. Supporting these needs can have long-term benefits and help break the cycle of disadvantage.

Our Story

Zoe Thomas sadly died unexpectedly from a short illness in 2012 at the age of just 13 years. She was amazing. She had an incredible love of people and always encouraged young people, including those suffering disadvantage, to follow their dreams, be their best and enjoy life. She also had a real talent and passion for music. Zoe’s approach to life is the inspiration for the Foundation.

Our Services & Music Program

The Foundation helps young disadvantaged people to aspire to be the best they can be through its innovative services which are based on the findings of published research.

Mentoring and personal skills guidance are combined with a music program that includes instrumental music tuition in a supportive group setting for young disadvantaged people who have a real interest in the performing arts. Each participant is not only helped to develop their talents but also the abilities necessary for them to realise their potential, including practical skills as well as mental skills such as those that strengthen self-esteem, self-belief and resilience.

We are working towards broadening our services to further support those young people in our Music Program into the future. In addition, we are looking to expand our services to help more young people in need.

High Tea Fundraiser

The Foundation is hosting a High Tea on 28th May 2017 as a major event in our fundraising calendar to help us further support young disadvantaged people in our communities. Raffles of donated items will be held during the event. Any donations to help support this event would be much appreciated and acknowledged by the Foundation.

Please contact Dr Peter Thomas on the number below or via ztfnews@gmail.com if you have any questions or require further information.
